LAMPIRE BIOLOGICAL LABORATORIES WELCOMES ADAM BARTOS, PHD AS SENIOR DIRECTOR OF ANTIBODY DISCOVERY

August 31st 2023 - Lampire Biological Laboratories is proud to announce an addition to their distinguished team: Dr. Adam Bartos, who will serve as the Senior Director of Antibody Development. Founded in 1977 by Gregory F. Krug, Lampire has continuously led the way in pioneering advancements within the life sciences sector. Dr. Bartos, renowned for his comprehensive academic and professional experience, is set to make substantial contributions to further enhance Lampire's enduring commitment to excellence. Notably, Lampire is also making strides by venturing into the drug discovery market, expanding their horizons and solidifying their position as industry leaders.

Dr. Bartos earned his PhD in Bioorganic Chemistry from Eötvös Loránd University, in Budapest Hungary. Notably, he served as a Senior Research Scientist at the State University of New York (SUNY), where his research expanded the understanding of various biological processes. Later, his tenure as a Senior Researcher at Harvard University showcased his multidisciplinary approach, combining biology and chemistry in innovative ways.

A pivotal chapter in Dr. Bartos's career unfolded at Boehringer Ingelheim, where he specialized in antibody generation and biotherapeutics, translating scientific insights into tangible medical advancements. As the Director of Antibody Discovery at Molecular Templates, he demonstrated adept leadership, guiding teams towards groundbreaking antibody-based therapies. Additionally, Dr. Bartos is an accomplished specialist in flow cytometry, a sophisticated cell analysis technique. His expertise in this field enhances Lampire Biological Laboratories' capabilities, further solidifying his commitment to pushing the boundaries of scientific exploration. With his impressive track

record, Dr. Bartos exemplifies unwavering dedication to advancing life sciences and contributing to solutions that have a positive impact on the world.

Lampire Biological Laboratories eagerly anticipates the impactful contributions of Dr. Bartos, whose expertise and leadership will undoubtedly steer the company's endeavors towards new horizons. As the Senior Director of Antibody Development, Dr. Bartos will bring a strong focus on monoclonal, polyclonal, and recombinant antibody development, harnessing his extensive knowledge and experience to drive Lampire's mission of advancing life sciences and delivering innovative solutions to the global community.
