

A simple-to-use, single-use device for the culture, harvest and storage of cells, constructed using a USP Class VI medical grade material displaying the high gas permeability needed to support rapid cell growth, and with the robustness necessary for centrifugation and long-term cryo-cell storage.

In addition to the screw cap fitment that facilitates cell harvesting, the OMNI C3 bags are available with both integrated needleless Luer-lock ports and needle ports for aseptic inoculation and sampling. These ports can also be used to connect several bags in series for easy production scale-up.

Furthermore, Lampire is able to provide the OMNI C3 bags pre-filled and sterilized with various cell scaffold materials. Uses for these scaffolds include maximizing the production of anchorage-dependent cells or advanced stem cell culture procedures in the OMNI C3 bags..

## Culture

The high gas permeability of the OMNI C3 bags eliminates the need for additional aeration and only a standard incubator is necessary to support the growth of several mammalian cell types including:

- Hybridomas
- CHO
- HEK293
- Jurkats
- Various stem cell lines

The Omni C3 bags can be adapted for the culture of insect, CHO-S and plant cells.

## Centrifugation

The 50mL, 250mL and 1L OMNI C3 bags fit into standard centrifuge adaptors and rotors, for single-step cell harvesting using standard centrifugation conditions. The large screw cap fitment allows easy removal of material from the bags.

## Cryo-Storage

The OMNI C3 bags are fully stable under conditions of cryo-storage, displaying chemical resistance to DMSO and DMF and maintaining strength and flexibility at temperatures employed for long-term cell storage.

**The Omni C3 bags are available in a range of sizes from 50mL up to 2L.**  
(see reverse side for standard configurations)

**These can be customized to meet specific applications from batch and scale-up cell culture to perfusion protocols.**

Standard Sizes and Configuration Available

Description	Fitment	2 Port	4 Port
50mL OMNI C3 Cell Culture Bag	X		
250mL OMNI C3 Cell Culture Bag	X		
250mL OMNI C3 Cell Culture Bag	X	X	
250mL OMNI C3 Cell Culture Bag	X		X
250mL OMNI C3 Cell Culture Bag		X	
250mL OMNI C3 Cell Culture Bag			X
1L OMNI C3 Cell Culture Bag	X		
1L OMNI C3 Cell Culture Bag	X	X	
1L OMNI C3 Cell Culture Bag	X		X
1L OMNI C3 Cell Culture Bag		X	
1L OMNI C3 Cell Culture Bag			X
2L OMNI C3 Cell Culture Bag	X		
2L OMNI C3 Cell Culture Bag	X	X	
2L OMNI C3 Cell Culture Bag	X		X
2L OMNI C3 Cell Culture Bag		X	
2L OMNI C3 Cell Culture Bag			X
<b>OMNI C3 Tubing Kit</b> (2 each: 36" tubing with male luer connectors, caps and roller clamp)			

# Culture

# Centrifuge

# Gyro

**Custom made bags are also available.**

The OMNI C3® Cell Culture Bags are available now.
