

LAMPIRE IACUC Questionnaire Form - Polyclonal Project

1. General Information

Company /Institution:		Project Name / Number:	
Investigator Name:		PO#	
Contact Name:		Phone:	
E-mail:		Fax:	

2. Species and Number of Animals

<input type="checkbox"/> Rabbit(s)	<input type="checkbox"/> Goat(s)	<input type="checkbox"/> Sheep	<input type="checkbox"/> Chicken(s)	<input type="checkbox"/> Mice	<input type="checkbox"/> Rat(s)	<input type="checkbox"/> Other: _____
Qty: _____	Qty: _____	Qty: _____	Qty: _____	Qty: _____	Qty: _____	Qty: _____

3. IACUC (Institutional Animal Care and Use Committee) Requirements

Lampire Biological Laboratories, Inc., in compliance with federal regulations, presents each animal-use project to IACUC (Institutional Animal Care and Use Committee) for approval prior to project initiation. Criteria for acceptance of a project are established in 9CFR, Chapter 1: Animal and Plant Health Inspection Service, USDA, Subchapter A- Animal Welfare.

To expedite initiation of your project, please complete the following questions and assurances as thoroughly as possible. If your company or institution is a USDA-registered facility with an IACUC of its own, Lampire may accept an approved Animal-Use Proposal from that committee. If any questions arise during our IACUC review of your project, you may be contacted for clarification.

Please briefly state your rationale for the appropriateness of the species of animals used for this activity:

(i.e., "Goats are appropriate host animals due to the volume of serum required in our project." Or "Sheep are appropriate host animals due to their immunologic response to the antigen refinements" or "Donkeys are appropriate host animals for this project as the characteristics of their antisera are consistent with established requirements for further manufacturing")

Please briefly state your rationale for the number of animals used for this activity:

(i.e., "One animal will yield an adequate volume of antiserum for determining an antibody response." or "Three animals will yield an adequate volume of antiserum for testing purposes." or "Ten animals will yield the necessary volume of antiserum required for manufacturing purposes")

Your signature below indicates this project does not unnecessarily duplicate previous experiments or project, the number of animals was minimized and alternatives to animal use were considered.

Print Name _____

Client Signature _____

Date _____

4. Project Approval (LAMPIRE use only)

Requested Need by Date of Technical Review (typically 2 business days):

Date: _____

Technical Review By: _____

Date: _____

Technical Representative
