### **About LAMPIRE**

"Providing educational opportunities in the life sciences is critical to workforce development. I believe this talented pool of employees will drive the future of diagnostic and pharmaceutical research. At Lampire, we are passionate about what we do. At every opportunity, we share that passion and experience with the next generation."

Gregory F. Krug,, President Lampire Biological Laboratories

Lampire is a privately held, international, biotech life science company that produces biological reagents used in the diagnostic and pharmaceutical industries. President, Gregory F. Krug and his family of longstanding employees, have built Lampire to the thriving company it is today.

Employing over 140 team members, Lampire manages over 600+ acres spanning multiple laboratories and farms. Lampire houses more than 5,000 animals representing over 20 species and employs animal and laboratory technicians with extensive experience and training in their respective fields.

Beyond the laboratory, Lampire is active in the community, supporting life science education programs and workforce development at both the local and state level. Founded in 1977, the products and services Lampire provides have impacted human and animal health around the world for over 40 years.

### **FAST FACT**

Over 75% of orders are customized to meet client specifications

### **LAMPIRE ADVANTAGE**

Over 40+ years of industry technical experience and recognition

Customized protocols, collection, processing and specifications

Competitive pricing, from research sized to bulk quantities

Knowledgeable and responsive sales and customer service staff

Quality driven cGMP production

Consistent, high-quaility and reproducible products

ISO 13485:2016 certification and AAALAC accreditation

Extensive diversity of animal donor models, exceeding 20 species

Technically trained, engaged and responsive project managers

Prompt turnaround from inquiry to initiation

EU compliant products available for international shipping

LAMPIRE specializes in custom polyclonal & monoclonal antibody development, secondary antibodies, IgGs, BSA, animal blood, tissues & organs, normal & disease state human serums & plasmas, cell media, OMNI C3® cell culture bags & contract manufacturing.

Our technical support services include free antigen review & design, peptide synthesis, purification, custom conjugation & immunoassay development. LAMPIRE is an ISO and AAALAC accredited, US manufacturer of high-quality, competitively priced products & services that ship around the world.
