LAMPIRE BIOLOGICAL LABORATORIES SPEAKS DURING THE SPRING INFORMATIONAL MEETING

This Week, Lee Kandt, VP of Business Development at LAMPIRE Biological Laboratories, was honored to be the keynote speaker at the Spring Informational Meeting for the Bedford Farm Bureau held in Bedford PA.

For many years LAMPIRE has worked closely with the Farm Bureau and their mission to enhance and strengthen the lives of rural Pennsylvanians and to build strong, prosperous agricultural communities.

The presentation focused on the role LAMPIRE plays in both biotechnology and agriculture. As both an agricultural and business partner in Bedford County for over 30 years, LAMPIRE has expanded to include 600+ acres encompassing laboratory space, farmland, pastures and vivarium's for over 2,000 animals. Combining agriculture and biotechnology provides an alternative to traditional farming but requires a delicate balance. LAMPIRE's mission is to provide quality, critical raw materials and drug discovery in diagnostics and scientific research around the world, while continuing to safeguard the wellbeing of their animals.

Lee Kandt also shared with the members the importance of the collaboration between the farms and the laboratories at LAMPIRE. The keynote highlighted some of the medical advancements that affect our everyday lives thanks to life saving research happening right here in Bedford. LAMPIRE employs over 75 local team members in various capacities from working on the farm in animal care to working in the laboratory.

According to Mr. Kandt, "It was truly my privilege to be in front of this group and talk about something very close to my heart. The importance of the research being done here in Bedford, through the cutting edge medical and veterinary drug discovery and development, helps not only people, but animals, live longer lives every day."

About LAMPIRE Biological Laboratories

LAMPIRE is an international, life science company that produces biological reagents and raw materials that are shipped worldwide and used across many applications. Servicing the diagnostic, pharmaceutical, biotechnology and drug discovery markets for over 45 years LAMPIRE is a trusted partner for high quality, reliable products, and services. LAMPIRE is comprised of multiple research campuses and three state-of-the-art laboratory facilities, strategically located across the state of Pennsylvania.
