CUSTOM
POLYCLONAL ANTIBODIES

Your In Vivo CRO LEADERS

At LAMPIRE, we provide high-quality polyclonal antibody production services using a variety of animal species, including rabbits, goats, sheep, chickens, and more. Our polyclonal projects are tailored to meet your specific needs and goals, encompassing antigen selection, immunization protocols, purification, and characterization methods.

We adhere strictly to the highest standards of animal welfare and ethical practices, as demonstrated by our IACUC review and AAALAC accreditation. Additionally, we ensure regular and timely communication throughout the project, furnishing you with updates on antigen inventories, project milestones, monthly boarding reports, and other relevant testing data. This enables you to monitor the progress of your project closely and make informed decisions regarding antigen modification, protocol adjustments, downstream processes, or production scale-up.

Furthermore, we extend additional testing services to our project clients, including ELISA, Western blot, immunohistochemistry, affinity measurements, and more. These services furnish critical insights into the specificity, sensitivity, and functionality of your polyclonal antibodies. Whether you require polyclonal antibodies for research, diagnostic, or therapeutic applications, LAMPIRE stands as your trusted partner, delivering dependable and customized solutions.

Species Available:

Rabbit, Goat, Sheep, Donkey, Llama, Alpaca, Chicken, Guinea Pig, Porcine, Bovine, Horse, Turkey, and Geese. (Other Species Available, Please Inquire)

Additional Services:

- Antigen Preparation
- Assays Against Host Antigen
- Assays Against Target Antigens
- ELISA Testing
- Pre-Immune Screening
- Antigen Conjugation
- Titer Testing
- Antibody Purification
- Antibody Conjugation
- Buffy Coats (PBMCs)
- RNA Isolation
- Affinity Purification
- Splenectomies & Bone Marrow Collection
- For Use In Downstream Antibody Production (B-Cell Sorting, Phage Display)

Contact us at sales@lampire.com or call 215-795-2838 to start your project. Embrace the future of antibody discovery with LAMPIRE.
